

## **REMARKS**

In the office action dated August 5, 2004, the Examiner rejected claims 1-22, and objected to the drawings.

Applicant has provided replacement drawing sheets 1-3. The Examiner objected to the legibility of the lines and numbers. Applicant has corrected this defect. Applicant has also corrected misplaced number 42, found on Fig. 2. A duplicate copy of Fig. 2 is provided with number 42 highlighted in red to emphasize the change.

In an Examiner's interview on September 22, 2004, Applicant and the Examiner clarified that in the present application, "target" refers to a bullet or shooting target, or shooting target range device, as is discussed in the specification.

In accordance with the Examiner's interview, Applicant has amended the independent claims to reflect this clarification, specifying that the targets claimed refer to shooting targets or bullet targets. Applicant has also amended claim 7 to correct a typographical error.

The cited art does not teach the use of a control device to control a shooting range target and is not analogous to the present invention. Indeed, the art does not teach controlling a object, but merely teaches the transferring of information between a computer and phone. Additionally, one skilled in the art of constructing and operating shooting targets would generally not be sophisticated in the use of electronics, would not be aware of Chien, and would not find it obvious to connect the device of Chien to a shooting target. Applicant therefore believes that the application is patentable over the cited art, and is thus in condition for allowance. Applicant therefore respectfully requests that the rejections be withdrawn.

Should the Examiner have additional concerns, it is requested that he contact Applicant's counsel, Randall B. Bateman, at (801) 533-0320 so that any concerns may be resolved.

Sincerely,

BATEMAN IP LAW GROUP

A handwritten signature in black ink, appearing to read "Randall B. Bateman", written over the printed name.
